GARDEN SHEDS

At oakenclough Buildings we can build and supply everything from a small garden shed for the storage of a few simple items, to a large workshop for day to day use.

Flexibility is key, we can build any size, and position doors and windows to suit your requirements. Sheds can be customised or manufactured to suit every taste and pocket.

Including double doors for versatility allows the building to be used for a wide variety of purposes, such as storage of a sit down mower.

If security is an issue we offer a range of steel reinforced doors and window grills to guard against unwanted intruders. Corner sheds also provide a practical storage solution to that awkward space at the bottom of the garden, therefore allowing you flexibility as well as a focal point for an otherwise unused part of your garden.

SUMMERHOUSES

After a hard day at work, there is nothing more better than being able to sit back and relax in the comfort of your own home and its surroundings. on those long summer evenings, an extra room in the garden is ideal for entertaining or relaxing. Imagine how your lifestyle would be transformed by one of our buildings. Unlike other garden building manufacturers, we don't tell you to make a choice from an anonymous brochure.

We ask you to measure your available space then imagine what building would best fit the available space, and together we can come to the perfect solution for you and your garden.

The extensive range of summerhouses have a double door placed in any position, together with windows placed where you want them, in a style of your choice. Whether you want opening or fixed windows, leaded or plain, manufactured or standard - the options are many and varied.

CORNER HOUSES

Corner houses can be used as the ideal focal point for your garden. They can be insulated and double glazed for all year use, and can have either a sloping or peaked roof. A wide variety of roof coverings are available from felt and cedar shingle to slatted or sedum. A shed can be added to the rear not only to provide a summerhouse but also a practical storage area. A sauna can also be built using a wood burning stove to make your perfect garden space.

GARDEN OFFICES

In an increasingly busy world, achieving a balance between home and work is never easy, and working from home could be the ideal solution. No more commuting and more time spent with family and friends must be a good idea.

However, few homes are equipped with either the space or a dedicated work area free from distractions. Building an extension may be a solution, but can be a lengthy and expensive process, and might not overcome the pitfalls of working from home., whereas it is unlikely that a garden office will require planning permission.

Garden offices can be customised to individual requirements if required, by providing different sizes, additional doors, partitions, extra height, or whatever is required.

Sales office

30FT X 12FT
With bi-fold doors

As with all our buildings we offer total flexibility in design and build. Our garden offices are lined and insulated for all year round use. The standard specification provides double glazed timber doors and windows. They can be upgraded using UPVC, or even bi folding doors. The walls, floor and roof are all insulated with ecotherm, and the walls lined with 16mm matchboard as the standard interior finish. The roofs are finished using a stone coated roofing material that is both durable and attractive.
